Essay

The JavaFX project creates art using coordinates.This program is cool because it is different from others. For this project i decided to make a beluga whale. My project "sisongkham_4_javaFXintro" creates a grid of different colored shapes using methods. First, i imported all of the methods i needed in order to do the project.

```
import javafx.application.Application;
import static javafx.beans.binding.Bindings.length;
import javafx.scene. Group;
import javafx.scene.Scene;
import javafx.scene.canvas.Canvas;
import javafx.scene.canvas.GraphicsContext;
import javafx.scene.paint.Color;
import javafx.scene.shape.ArcType;
import javafx.stage.Stage;
```
